Warranty Information
Updated 8.2017

All Steel Carports come with a standard 1 year maintenance warranty from date of installation, that covers general leaks, repairs and rust to the metal or frame of the building.
ALL BUILDINGS HAVE A ROOF SNOWLOAD OF 40 LBS PER SQUARE FOOT.

LEAKS
Leaks that occur in the roof of the building where metal is fastened to the frame are covered in this 1 year maintenance warranty. (Overlaps on Horizontal metal are not covered in the warranty as buildings longer than 36ft should have a vertical metal application to avoid leak potential.)
No Warranty is provided for leaking at base rail or under the doors. Please see our video for instructions for pouring a concrete foundation to avoid water coming into the building under the base rail which is on our website.

RUST
The 14 gauge steel option carries a 1 year no rust warranty. If the frame rusts within the first year we will repair and/or replace it.
The 12 gauge steel option carries a 20 year no rust warranty. If the frame rusts within 20 years we will repair and/or replace it.

WIND
All buildings are installed with the standard rebar rod which does not provide any warranty against wind damage. (Customers may purchase optional anchors, braces and supports which will provide a 20 year warranty against wind damage.)
Wind Warranty is voided when customer uses their own anchors or when the anchors cannot be securely fastened into the ground due to rock or unleveled ground which does not allow the anchors to be properly fastened into the ground.

1 year warranty: Damages caused by wind to the sheet metal or trim are covered in the 1 year maintenance warranty.

20 year wind warranty
Covers wind damage to the frame up to 120 mph. (Hurricane Cat 1 warranty). This warranty is available when the required number of additional anchors, bracing (if required) and concrete supports are purchased.

6ft Tall buildings:
